There are several mailing lists which provide a free and informative channel for getting technical support from NI / Ettus Research engineers as well as from many experts in the SDR community.

The focus of the [usrp-users mailing list](#) is for questions and discussions about the NI/Ettus USRP hardware as well as the UHD and RFNoC software.

The archives for the usrp-users mailing list can be found [here](#).

The focus of the [discuss-gnuradio mailing list](#) is for questions and discussions about the GNU Radio software in general, whether being used with USRP devices or not.

The archives for the discuss-gnuradio can be found [here](#).

More information about the discuss-gnuradio mailing list is available [here](#).

The focus of the [srsran-users mailing list](#) is for questions and discussions about the [srsRAN](#) software stack for [4G/LTE](#) and for [5G/NR](#) from the [srsRAN Project from Software Radio Systems \(SRS\)](#).

In addition to the srsran-users mailing list, there is also a GitHub Discussions forum for the srsRAN software stack [here](#).

The archives for the srsran-users mailing list can be found [here](#).

The focus of the [openair5g-user mailing list](#) is for questions and discussions from users about the [OpenAirInterface \(OAI\)](#) software stack from [Eurecom](#).

Additional information about the OAI mailing lists can be found [here](#) and [here](#).
