

Slack

The GNU Radio Project maintains a Slack Workspace where the community can have discussions and conversations. This is a great way to chat in real-time with people from Ettus Research as well as with people in the community. The Slack Workspace has a two-way mirror with the GNU Radio #gnuradio IRC channel. Slack is free and open to everyone. You can use Slack from a desktop application, from a web browser such as Firefox, Chrome, Safari, or Edge, and also from your Android and Apple iOS smartphone.
